

# I am massively ahead of the game.

SMART GIRLS  
FINISH FIRST.

Finally, a college that thinks like you think. **Kettering University**

Do you look at a product, a process, or an idea and wonder, "Why can't it be smarter? Simpler? Cleaner? Cooler?" Then you belong at Kettering. Whatever your interest — Engineering, Math, Science, Business — we have experts, labs, and programs that bring theory and practice together better than anywhere else. And because you can start in a paid co-op experience as early as freshman year, you're never just a college student at Kettering. You're making a name for yourself in the professional world.

Jena Miller, '10  
Mechanical Engineering  
Co-op at Avon Automotive
